

QUALITY

In terms of customer satisfaction and increase of our activity in dependence on the quality of products, services and work in the organization, it is established and applied a quality management system according to ISO 9001. From suppliers of material for the production of food products we require only the highest quality, which are declared by laboratory analysis and certificates.

Flexibility, Easily

RELIABILITY

We know that employees are the creators of our success.

PRODUCTION OF PLASTIC PACKAGING

COMPANY TRADITION

SAWIUS Company Ltd. was established with the purchase of technology and know-how of a company with a long history. A crucial part of our production consists of packaging for the food industry. We also focus on the implementation of technical blisters for the automotive and electrotechnical industry. Tradition is our success.

Our goal is to be partners with the world's leading manufacturers.

Our customers are not only multinationals but also smaller companies which we help to get into the minds of consumers. Because our packaging sells. Our clients expect not only consulting, design and final implementation without stress, but also high quality product for which they are willing to pay well.

For us, each project is interesting and we want to be the one who works it out for you.

We are determined to stand firm behind your ideas.

- Our well-equipped workshop helps us to be the first choice for our customers, who appreciate that we make the molds ourselves.
- More than 1,000 kinds of forms.
- Daily production capacity is 400,000 pcs of plastic blisters
- With our approach we maintain competitiveness and are able to respond to the increasing demands of the market.
- Our goal is to maintain excellent results and trustworthiness.

FOOD INDUSTRY

With our thermoforming machines GN and ILLIG we meet the highest demands for unique packaging.

Our team of people is involved in the production process, from design to the final product. A new product begins to form with 3D programming, then it gets to our tool room where with CNC milling a mold for a new plastic molding is made quickly and reliably.

As an added value we offer a LOGO of the final product based on the client's requests.

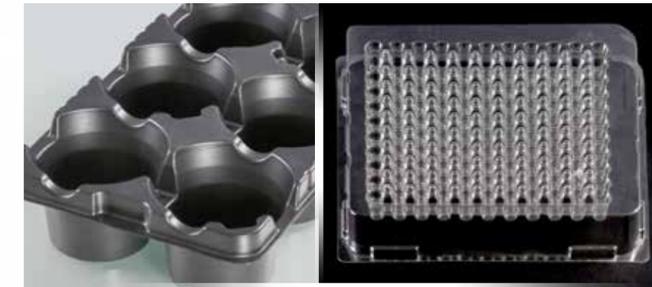

We offer plastic moldings of PET, OPS, PP, PVC, PS materials, according to your requirements:

- dessert inserts
- bowls and trays
- boxes with lid
- blisters for cakes and confectionery
- technical blisters

OTHER INDUSTRIES

For some years we have been focusing on the automotive and electrotechnical industry.

Based on the requirements of our clients, we also produce a variety of anti-static foil trays and plastic covers, special blisters for packing fragile products.
